*Precision that pays ...*

## One source solutions for all weighing needs

The development of our product line is focused on the individual needs of our customers. In addition to our flagship product, the Weigh Cell, we also offer an extensive range of accessories. For example, the lightweight design of our transport and conveyor systems can be specially adapted to fit your applications and it guarantees easy integration with your equipment. Our range of product accessories includes everything from supplemental units like servo motors to controls, display units, gating electronics, software, power supply units, start-up kits for initial operations, and analytical tools.

We offer our customers a broad range of expertise in weighing technology that facilitates your every need: You can rely on consulting, development, products and services all from just one supplier! The high quality of our products ensures a reliable solution for a variety of different applications.

**Weighing and conveyor systems:**  
*Various sizes and models*

WÄGEGEOTECHNIK

### Our know-how – Your security

- ▶ A variety of single and multi-track weighing system solutions
- ▶ Custom integration of Weigh Cells with plant and equipment
- ▶ Flexible connections to control systems provided by the customer
- ▶ Accurate weighing in difficult environments

## Your unique problem – a special challenge for Wipotec

Every issue encountered in weighing technology is a challenge waiting to be solved by Wipotec. Our advanced product development is based on market and customer requirements and demonstrates, on a daily basis, our unique competence in solving problems. In the modern industrial environment, there are always new situations and special technical requirements for which there is no appropriate standard solution. This is when our sales and development team can provide the competent advice and analysis needed to develop a solution specially designed for your situation. The depth of our manufacturing operations allows us to take on the design and development of custom components at all times.

**Power drives:** Servo motors in various designs for diverse applications

**Control and display units:** Touch screens in various models for industrial PCs or micro-controller panels

**fastmode**

**Software:** Analytical tools, custom software solutions, networked systems, scales software for statistical analysis of production data

**Other products:** Profi-bus modules and Weigh Cell power units for installation in control boxes and start-up kits

- ▶ Fast applications with up to 600 measurements per minute
- ▶ Professional customer-specific support
- ▶ Modular product portfolio
- ▶ High degree of manufacturing depth - from component board assembly to complete units
